

90120POLECAT PoleCat S/M

A lightweight pole choking device. Easily adjustable, it is designed to arrest in a very short distance and minimizes the effect in the event of a fall. Fits small to standard pole size (Ø125–285mm).

Cut resistant webbing, clearly visible in PD Yellow 1023. Rubber grip pads provide an extremely short stopping distance in the event of a fall. Large snap hook, easy to use with gloves. Adjustable buckles which allow use on a wide variety of pole diameters. There is a detachable section for narrow poles and an additional section can be added for transmission poles. One-handed operation rope adjuster for comfortable grip which provides easy adjustment on the pole. Captive karabiners to prevent loss. Integrated shock absorber and fall arrest indicators: Pat. App. Significantly reduces the load on the user in the event of a fall and fall arrest indicators provide evidence of a fall.

Product Code:	90120POLECAT
Conformance:	Class A1: EATS 43-123, 1999; Gaff must be used in icy/slippery conditions; EN 358:1999
Suitability:	Ø125–285mm
Material:	Webbing: heavy duty polyester D-Ring: aluminium Rope: aramid cut resistant with wear sleeve or polyester kernmantle Handles: moulded plastic— allows easy movement up and down the pole Carabiners: aluminium (three stage action).
